## **Student spotlight**

Beavers are industrious engineers in the animal kingdom and play a vital role in maintaining healthy ecosystems. Beaver dams create wetlands, which serve as crucial habitats for a diverse range of species and help to regulate water flow and mitigate the effects of floods and droughts.

Understanding where to focus beaver-based restoration for habitat and climate change mitigation is critical, and that's precisely what a recent project undertaken by Alessandro Freeman, BCIT Masters of Ecological Restoration student, aimed to do.

[Meet Alessandro Freeman](#)

## 2025/2026 BCIT Future Student Guide

Check out the new Future Student Guide and get a glimpse into all that BCIT has to offer—from programs to services, and tips to get started.
